

COLOR PSYCHOLOGY STUDY

CODTECH UI/UX Internship

Prepared By: TALLAM HARIKA

Intern ID: CITS2799

Introduction

Color psychology is the study of how colors influence human emotions, behavior, and decision-making. In UI/UX design, colors play an important role in improving user experience and communication.

1. Red

Meaning:

- Energy
- Urgency
- Excitement

Examples:

- Sale banners
- Emergency alerts
- Discount offers

2. Blue

Meaning:

- Trust
- Security
- Reliability

Examples:

- Banking applications
- Social media platforms
- Corporate websites

3. Green

Meaning:

- Growth
- Health
- Nature

Examples:

- Environmental websites
- Health applications
- Finance apps

4. Yellow

Meaning:

- Happiness
- Positivity
- Attention

Examples:

- Promotional banners
- Children's applications
- Highlight sections

5. Black

Meaning:

- Luxury
- Elegance
- Power

Examples:

- Premium brands
- Fashion websites
- Luxury product advertisements

- **CONCLUSION:** Colors significantly affect user perception and behavior. Understanding color psychology helps designers create visually appealing and user-friendly interfaces.
